Education

J.N.T.U-Vizianagaram **Nov** 2023 – **Nov** 2025
Avanthi Institute of Engineering and Technology- (MCA) – CGPA:**8.67/10**

Adikavi Nannaya University- ELURU **Aug** 2020 – **May** 2023
CH. S. D. ST. Theresa's College for Women(A), – CGPA:**8.74/10**

Relevant Coursework

- Data structure
- Algorithms Analysis
- Database Management
- DWDM
- Operating Systems
- Systems Programming
- Machine Learning
- Internet Technology

Experience

Sales force Internship **Jan** 2023-- **April** 2023
Sales force Internship at Hyderabad in IT Hub

- Developed automated Salesforce workflows to streamline daily data validation and reduce CRM issue resolution time.
- Built Apex scripts and used Flow/Process Builder to collect, format, and update CRM records with accurate customer and product data.
- Utilized Salesforce APIs and CI/CD pipelines to automate metadata deployment, validations, and daily system health checks.
- Designed visual and interactive CRM performance reports using Salesforce dashboards, LWC, HTML, JavaScript, and CSS.

Projects

Social Media Depression Detection (ML/AI) **Dec** 2024 – **May** 2025

- Developed predictive models using SVM, Random Forest, and Deep Learning for mental-health risk classification.
- Applied ML and NLP techniques to analyze social media text and detect early indicators of depression.
- Preprocessed large text datasets using tokenization, lemmatization, stop-word removal, and sentiment analysis.
- Engineered linguistic, emotional, and behavioral features to improve model accuracy and precision.

Android accident detection &. Alert system **Sep** 2024 -- **Dec** 2024

- Developed an Android-based accident detection system using accelerometer and gyroscope sensors for real-time.
- Implemented automated emergency SMS alerts with live GPS location sharing to predefined contacts.
- Integrated Google Maps and Location Services APIs to capture, track, and share accurate accident location data.
- Optimized sensor data processing and background services to minimize false alerts and reduce battery consumption.

Water Facilities and Drinking Water Availability. **Jan** 2021 – **April** 2021

- Collected and analyzed data on water sources such as borewells, hand pumps, public taps, and piped supply.
- Clean drinking water is essential for good health and prevents many water-borne diseases.
- Proper water facilities like pipelines, filtration systems, and storage tanks help provide safe water to all people.
- Identified issues such as irregular supply, contamination risks, leakage, and unequal distribution.

Technologies

Programming : Python, C, C++, CSS, Java, SQL, HTML, JavaScript, Java Full Stack.
Core CS : Data Structures, Algorithms, Operating Systems, Machine Learning
Development : Git/GitHub
Tools : VS Code, Microsoft Office, Jupyter Notebook

Certifications

- Awarded with a certificate in Employability Training Program conducted by Nandi Foundation – Tech Mahindra.
- Awarded with a certificate in Python of data science.
